# Introduction

The *Missouri Juvenile and Family Division Annual Report* provides a comprehensive account of both case activity and youth served for calendar year 2016. This report presents general population data for Missouri youth; summary statistics on the youth referred for status, law, and abuse and neglect to Missouri's juvenile division; the risk and needs characteristics of the juvenile offender population; detention and DYS populations; recidivism rates; certifications of juveniles to adult court; disproportionate minority contact rates, Juvenile Officer Weighted Workload; and time standards for child abuse and neglect cases.

The *Missouri Juvenile and Family Division Annual Report* is not possible without the help of Missouri's juvenile and family court staff. It is their commitment to improving outcomes for court involved youth and their families that ensures the integrity of the information reported here.

## Section 1: Missouri's Youth Population

Section 1 describes the 2015 population of Missouri's youth (ages 10-17). This description provides a useful context for considering subsequent sections of the report related to a subset of youth involved with juvenile and family court divisions in Missouri [Source: Missouri Census Data Center].

**Figure 1-1 Youth Population**  
In CY15, Missouri's youth population, ages 10-17, was 629,138. This represents less than a 1% decrease from the previous year; and a 4% decrease from 2008.

**Figure 1-2 Projected Youth Population**  
Population projections, compiled in 2008 for the Missouri youth population, suggest it will decrease until approximately 2015 at which time the population will increase at an average rate of nearly 2.5% every 5 years until 2030.

**Figure 1-3 Youth Population by Age and Sex**  
In CY15, males outnumbered females across all age groups in Missouri's population of 10-17 year old youths.

**Figure 1-4 Youth Population by Sex**

In CY15, 51% [322,098] of Missouri's youth population was male and 49% [307,040] was female. These figures have not changed over the last three years.

**Figure 1-5 Youth Population by Race**

Between CY14 and CY15, the population of Native American youth increased by 0.2% to 3,559, the population of Asian / Pacific Islander youth increased by 4.0% to 14,581, and the population of Hispanic youth increased by 4.8% to 37,027 over the previous year. The population of black youth decreased by 0.4% to 93,407, while the population of white youth decreased by 0.3% 480,564 from the previous year.

## Section 2: Juvenile & Family Division Referrals

---

The Missouri Juvenile Officer Performance Standards (2017) define a juvenile and family division referral as *“the initial information provided to the juvenile officer from the referring agency inclusive of the identifying information and basis for the jurisdiction of the juvenile court.”* For the purpose of annual reporting, unless otherwise indicated, disposed referrals represent the unit of measurement, not individual youth. A disposition refers to the outcome or finding of a referral [see pages 14-15 for details about how these dispositions are reported in Missouri’s Judicial Information System (JIS)].

The juvenile and family division is responsible for processing and supervising four referral types:

- **Status Offenses:** Status offense referrals mainly include Behavior Injurious to Self/Others, Habitually Absent from Home, Truancy, Beyond Parental Control, and Status-Other. **Note:** The following offenses were also counted as Status Offenses: Juvenile Municipal Ordinance violations, which are those municipal ordinance violations that are explicitly labeled with “JUVMUNI” in the charge code (<http://www.mshp.dps.missouri.gov/MSHPWeb/PatrolDivisions/CRID/documents/2016JuvenileChargeCodes.pdf>).
- **Law Offenses:** Law offense referrals include all criminal violations listed in the Missouri Charge Code Manual, including infraction and ordinance violations, except Juvenile Municipal Ordinance violations.
- **Child Abuse and Neglect (CA/N):** CA/N referrals are allegations of child abuse or neglect where the child is the victim or custody related matters are an issue. Abuse referrals include Abuse-Emotional, Abuse-Incest, Abuse-Other Sexual, and Physical Abuse. Neglect referrals include Abandonment, Neglect-Education, Neglect-Improper Care/Supervision, Neglect-Medical Care, Neglect-Surgical Care, and Neglect-Other. Custody referrals include Abduction, Protective Custody, Transfer of Custody, Termination of Parental Rights, and Relief of Custody.
- **Administrative:** Administrative referrals include Violation of Valid Court Order, Juvenile Informal Supervision/Technical Violation, and Juvenile Formal Supervision/Technical Violation.<sup>1</sup>

Section 2 presents information on disposed referrals at the state level for the juvenile and family division in calendar year 2016.

---

<sup>1</sup> Counts of Administrative referrals throughout this report include these additional violations: Prob / Parole Violation and Probation Violation (Municipal Ordinance). While not sanctioned for use on juvenile referrals, circuits have used these charge codes in CY16.

## Section 2: Juvenile & Family Division Referrals

<b>Table 2-1 Source of Referrals</b> Referrals to Missouri’s juvenile and family division originate from a variety of sources. In CY16, 44% of all referrals originated from some type of law enforcement agency, primarily municipal police [37%]. The Children’s Division of Missouri’s Department of Social Services accounted for 22% of all referrals, followed by schools [21%] (School Personnel and Resource Officer). Missing Data [748].	<b>Source of Referral</b>	<b>Frequency</b>	<b>Percentage</b>
	Municipal Police	19,101	36.92 %
	CD	11,325	21.89 %
	School Personnel	8,478	16.39 %
	County Sheriff	3,016	5.83 %
	Juv Court Personnel	2,798	5.41 %
	School Resource Officer	2,296	4.44 %
	Parent	2,096	4.05 %
	Other	1,139	2.20 %
	Other Juv Court	433	0.84 %
	Other Law Enforcement	298	0.58 %
	Private Social Agency	234	0.45 %
	Highway Patrol	177	0.34 %
	Other Relative	171	0.33 %
	Victim or Self	83	0.16 %
	Public Social Agency	78	0.15 %
	DMH	13	0.03 %
	<b>Grand Total</b>	<b>51,736</b>	<b>100.00 %</b>

<b>Figure 2-1 Referrals by Referral Type</b> In CY16, a total of 52,484 referrals were disposed. The largest percentage [36%, 18,820] was for law violations. The rest of the referrals were divided between abuse / neglect allegations [32%, 16,704], status offenses [28%, 14,744], and administrative offenses [4%, 2,080]. Missing Data [136].  <b>Note:</b> Juvenile Municipal Ordinance violations are included with status referrals.	<div><div><div><div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> <div><div></div><div></div><div></div><div></div></div> ----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Total Referrals by Sex****Figure 2-2 Referrals by Sex**

For all the disposed referrals in CY16, males were responsible for 61% [32,025] and females for the remaining 39% [20,388].  
Missing Data [71]

**Total Referrals by Race****Figure 2-3 Referrals by Race**

Approximately, 71% [36,765] of all disposed referrals were for white youth and 26% [13,667] for black youth. Hispanic youth accounted for 3% [1,372], Asian / Pacific Islander youth accounted for .4% [231], and Native American youth accounted for 0.2% [120].  
Missing Data [329].

Age	Frequency	Percentage
< 10	12,752	24.3 %
10	1,734	3.3 %
11	2,187	4.2 %
12	3,254	6.2 %
13	4,860	9.3 %
14	7,063	13.5 %
15	8,749	16.7 %
16	10,337	19.7 %
>= 17	1,506	2.9 %
<b>Grand Total</b>	<b>52,442</b>	<b>100.0 %</b>

**Figure 2-4 Referrals by Age**

The youngest age group, under 10 years, was responsible for 24% [12,752] of all referrals. Youth aged 16, were responsible for the next largest proportion, 20% of referrals [10,337], followed by youth aged 15, 17% [8,749]. Youth aged 14 accounted for 22% of referrals [7,063], youth aged 13 accounted for 9% [4,860], youth aged 12 accounted for 6% [3,254], youth aged 11 accounted for 4% [2,187], and youth aged 10 accounted for 3% [1,734]. Youth 17 years and older represented the remaining 3% [1,506].  
Missing Data [42]

**Figure 2-5 Youth Referral Trend**

The total number of disposed referrals declined by 22% from 2008 to 2016. The trend shows the greatest decrease in law referrals (-47%). While status referrals decreased (-14%), CA/N referrals increased (35%), and administrative referrals increased by 2% over that period. Since last year, there was a decrease of in status referrals (-3%), CA/N referrals (-5%), and law referrals (-7%), while administrative referrals increased (84%).

**Figure 2-6 Youth Referrals by Sex**

Disposed referrals declined more for males (-25%) than for females (-16%) from 2008 to 2016. Between 2015 and 2016, the number referrals of males declined (-5%) and referrals of females declined (-3%).

**Figure 2-7 Youth Referrals by Race**

From 2008-2016, disposed referrals of white youth declined (-17%), referrals of black youth declined (-31%), referrals of Hispanic youth increased (15%), referrals of Asian / Pacific Islander youth increased (3%), and referrals of Native American youth increased (29%).

**Note:** Asian / Pacific Islander and Native American youth are not displayed to maintain readability.

The juvenile and family division responds to referrals either through a formal or informal process. Through the formal process, a juvenile officer files a petition in the juvenile and family division to have a judge hear and determine the outcome of the allegations contained in the petition. Through the informal process, a juvenile officer determines the disposition of the allegations contained in the referral without filing a petition seeking formal judicial jurisdiction. The following referral dispositions are recorded on the ***Site Defined (COASITE)*** form of the ***Custom Docket Entry and Maintenance (CDADOCT)*** of JIS.

***Formal Dispositions:***

**Allegation True, Youth Receives Out-of-Home Placement** – A judicial action finding the allegation true. Youth is placed out-of-home with the Division of Youth Services (DYS), in foster care, with a relative, or with a private or public agency. [JIS Docket = DVPTN]

**Allegation True, Youth Receives In-Home Services** – A judicial action finding the allegation true. Youth receives services while remaining in his or her home. This disposition requires the youth to receive supervision through the juvenile division. [JIS Docket = DVPTN]

**Allegation True, No Services** – A judicial action finding the allegation true; however, the youth receives no services or supervision. [JIS Docket = DVPTN]

**Allegation Not True** – A judicial action which results in the termination of a juvenile case during the initial juvenile division hearing because the allegation is found not true. [JIS Docket = DVPTN]

**Sustain Motion to Dismiss** – A judicial action which results in a motion to dismiss the petition before the initial division hearing. [JIS Docket = DVPTN]

**Juvenile Certified – Felony Allegation** - A judicial action sustaining a motion to dismiss a petition to the juvenile division and allow prosecution of youth under the general law. [JIS Docket = DVPTN]

***Informal Dispositions:***

**Informal Adjustment with Supervision:** Any informal non-judicial activity that occurs without the filing of a petition and involves supervision of youth by written agreement and complies with Missouri Supreme Court Rules for an informal adjustment conference and the relevant contact standards contained in the Standards for the Administration of Juvenile Justice. This disposition requires completion of the risk and needs assessment when the referral is for a status or delinquency allegation. [JIS Docket = VIAWS]

**Informal Adjustment without Supervision:** Any informal non-judicial activity that occurs without the filing of a petition and involves supervision of youth by written agreement and complies with Missouri Supreme Court Rules for an informal adjustment conference. Although services may be monitored, this disposition does not include direct supervision of a youth in accordance with the Standards for the Administration of Juvenile Justice. However, because the disposition is applied on the basis of an informal adjustment conference, completion of the mandated risk and needs assessments is required when the referral is for a status or delinquency allegation. [JIS Docket = VIANS]

**Informal Adjustment, Counseled and Warned:** Any informal non-judicial activity that entails no more than brief face-to-face, telephone, or warning letter with the intent to inform, counsel, and warn the youth and/or family regarding a referral received. No official informal adjustment conference, per Supreme Court Rule is held; therefore completion of the mandated risk or needs assessments is not required when the referral is for a status or delinquency allegation. [JIS Docket = DVCAW]

**Transfer to Other Juvenile Division:** A non-judicial activity where a youth's case file and associated records are transferred to another juvenile division for disposition. Depending on when this disposition is applied, an official informal adjustment conference and associated assessments may or may not occur. [JIS Docket = DVTJC]

**Transfer to Other Agency:** A non-judicial activity where a youth's case file and associated records are transferred to another agency (CD, DMH, DYS, or other public or private agency) for disposition. Depending on when this disposition is applied, an official informal adjustment conference and associated assessments may or may not occur. [JIS Docket = DVTA]

**Referral Rejected:** The referral is rejected because there is insufficient information for administrative action to proceed or the referral is found not true. No informal adjustment conference is conducted and no assessments are required. [JIS Docket = DVRIE – Insufficient information; DVRNT – Not True]

<p style="text-align: center;"><b>Action Taken</b></p>  <table border="1"> <thead> <tr> <th>Action Taken</th> <th>Count</th> </tr> </thead> <tbody> <tr> <td>Formal</td> <td>13,160</td> </tr> <tr> <td>Informal</td> <td>38,563</td> </tr> </tbody> </table>	Action Taken	Count	Formal	13,160	Informal	38,563	<p><b>Figure 2-8 Youth Referrals by Action Taken</b></p> <p>In CY16, 74% [38,563] of all referrals were disposed through the informal process. ## Section 3: Law Violation Referrals

Section 3 describes law violation referrals disposed by Missouri's juvenile and family division. Law violation referrals made up 36% of all referrals disposed in CY16. A law violation referral is counted as a single delinquent act represented by the most serious allegation charged (misdemeanor or higher). However, multiple delinquent acts may be associated with a single referral. **Note:** Infractions and municipal ordinances are included under law violations.

<b>Table 3-1 Source of Law Violation Referrals</b> The source of 79% of law violation referrals was some form of law enforcement agency, primarily municipal police [68%] and county sheriff departments [9%]. Schools were the second highest referring agency [15%] (School Personnel and Resource Officer combined). Missing Data [86]	<b>Source of Referral</b>	<b>Frequency</b>	<b>Percentage</b>
	Municipal Police	12,564	68.10 %
	County Sheriff	1,714	9.29 %
	School Resource Officer	1,707	9.25 %
	School Personnel	1,062	5.76 %

**Note:** Juvenile municipal ordinances are listed under status offenses.

**Figure 3-5 Law Violation Referrals by Action Taken**  
Eighty-two percent [15,183] of law violation referrals were disposed through the informal court process. The remaining 18% required formal court intervention [3,256].  
Missing Data [96]

**Action Taken for Law Violation Referrals**

**Figure 3-6 Law Violation Referrals by Disposition**  
The most frequently used method of disposing law violation referrals was Informal Adjustment with Supervision [21%, 3,805], followed by Informal Adjustment without Supervision [18%, 3,362]. Allegation True With In-Home Services was the most frequently applied formal disposition [9%, 1,654], followed by Allegation True-Out-of-Home Placement [5%, 879]. Less than 1% [85] of referrals resulted in petitions for Certification to Adult Court.  
Missing Data [96]

**Law Violations by Disposition**

## Section 4: Status Offense Referrals

Section 4 describes status offense referrals disposed by the juvenile and family division. Status offense referrals made up 28% of all referrals in CY16. A status violation referral is counted as a single behavioral act represented by the most serious allegation charged. However, multiple status offense acts may be associated with a single referral.

Source of Referral	Frequency	Percentage
School Personnel	5,322	36.2 %
Municipal Police	5,196	35.4 %
Parent	1,263	8.6 %
County Sheriff	1,000	6.8 %

Grand Total	14,689	100.0 %

<p><b>Table 4-1 Source of Status Violation Referrals</b></p> <p>Forty-three percent of status violation referrals originated from some form of law enforcement agency, primarily municipal police [35%] and county sheriff departments [7%]. Schools [40%] were the second highest referring agency (School Personnel and Resource Officer combined), followed by parents [9%] and Juvenile Division Personnel [7%].</p> <p>Missing Data [55]</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Status Referrals by Allegation**

BEHAVIOR INJURIOUS TO SELF/OTHERS	4,508
TRUANCY	3,737
HABITUALLY ABSENT FROM HOME	2,661
BEYOND PARENTAL CONTROL	2,296
MUNI - CURFEW	706
STATUS OFFENSE - OTHER	704
MUNI - OTHER VIOLATION	64
MUNI - POSSESSION/USE OF A TOBACCO PRODUCT	53
MUNI - PEACE DISTURBANCE	9
MUNI - POSSESSION/DISCHARGE ARMS	4
MUNI - SOLICIT WITHOUT PERMISSION	1
MUNI - ANIMAL LAW	1

<p><b>Figure 4-1 Status Violation Referrals by Allegation</b></p> <p>Behavior Injurious to Self or Others [31%, 4,508] was the most frequent status offense for which youth were referred, followed closely by Truancy [25%, 3,737]. Muni-Curfew constitutes 5% of status offense referrals, while the remaining Juvenile Municipal Ordinance charges combined account for less than 1% of all status offense referrals.</p> <p>Missing data [0].</p> <p><b>Note:</b> Juvenile Municipal Ordinances are included in Status Offenses.</p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Figure 4-2 Status Offense Referrals by Allegation and Sex**

An approximately equal percentage of males [16%, 1,370] and females [15%, 921] were referred for Beyond Parental Control. However, females were most likely to be referred for Truancy [28%, 1,728], whereas males were more likely to be referred for Behavior Injurious to Self/Others [34%, 2,909]. Missing Data [16]

**Note:** Due to space constraints, only Muni-Curfew Juvenile Muni Ordinance is included.

**Status Offenses by Allegation and Sex**

**Figure 4-3 Status Offense Referrals by Allegation and Race**

Status violation referrals for white youth were most frequently for Behavior Injurious to Self or Others [32%, 3,484] and Truancy [26%, 2,795]. Black youth were most frequently referred for Habitually Absent from Home [28%, 930], followed by Behavior Injurious to Self or Others [25%, 833]. Missing Data [65]

**Note:** Due to space constraints, only Muni-Curfew Juvenile Muni Ordinance is included.

**Status Violations by Allegation and Race**

**Figure 4-6 Status Offense Referrals by Disposition**  
 Informal Adjustment, No Action [29%, 4,242] was the most frequently used method for disposing status referrals, followed by Informal Adjustment without Supervision [22%, 3,284]. Allegation True with In-Home Services was the most frequently applied formal disposition [5%, 689]. Missing Data [56]

## Section 5: Child Abuse and Neglect Referrals

Section 5 describes child abuse and neglect (CA/N) referrals disposed by Missouri's juvenile and family division. CA/N referrals made up 32% of all referrals in CY16. A CA/N referral is counted as a single event, represented by the most serious allegation where a youth is the victim. However, a youth may be the victim of multiple incidences of abuse and/or neglect at the time at which they are referred.

Source of Referral	Frequency	Percentage
CD	10,363	64.08 %
School Personnel	1,768	10.93 %
Municipal Police	1,051	6.50 %
Other	986	6.10 %
Juv Court Personnel	676	4.18 %
Parent	557	3.44 %
County Sheriff	286	1.77 %
Other Juv Court	177	1.09 %
Private Social Agency	143	0.88 %
Other Relative	67	0.41 %
School Resource Officer	45	0.28 %
Highway Patrol	15	0.09 %
Other Law Enforcement	12	0.07 %
Victim or Self	12	0.07 %
Public Social Agency	11	0.07 %
DMH	2	0.01 %
<b>Grand Total</b>	<b>16,171</b>	<b>100.00 %</b>

**Table 5-1 Source of CA/N Referrals**  
The source of 64% of all CA/N referrals was Children's Division (CD) of Missouri's Department of Social Services (DSS). Law enforcement agencies were responsible for 8% of the referrals. Approximately, 11% of the referrals originated from schools (School Personnel and Resource Officer combined). Missing Data [533]

**Child Abuse & Neglect Referrals by Referral Type**

NEGLECT - IMPROPER CARE/SUPERVISION	7,472
NEGLECT - OTHER	2,215
NEGLECT - EDUCATION	1,927
ABUSE - PHYSICAL	1,374
TERMINATION OF PARENTAL RIGHTS	1,091
PROTECTIVE CUSTODY	704
ABUSE - OTHER SEXUAL	684
ABUSE - EMOTIONAL	593
NEGLECT - MEDICAL CARE	322
MENTAL HEALTH SERVICES	82
ABANDONMENT	72
TRANSFER OF CUSTODY	64
ABUSE - INCEST	45
RELIEF OF CUSTODY	37
ABDUCTION	10
NEGLECT - SURGICAL CARE	8
YOUTH BEST INTERESTS TO RETURN TO THE CUSTODY OF THE CHILDREN'S	4

**Figure 5-1 CA/N Referrals by Allegation Type**  
Neglect–Improper Care / Supervision represented nearly half [45%, 7,472] of all CA/N referrals, followed by Neglect–Other [13%, 2,215] and Neglect–Education [12%, 1,927].

**Figure 5-2 CA/N Referrals by Allegation and Sex**

Within sex, the percentage of Neglect related referrals was slightly greater for males [73%, 6,043] than for females [71%, 5,958]. Conversely, referrals for Abuse were greater for females [18%, 1,471] compared with their male counterparts [15%, 1,217]. Missing Data [27]

**Figure 5-3 CA/N Referrals by Allegation and Race**

Youth were most likely to be referred for Neglect. Black youth were more likely than other minority youth to be referred for Abuse. Missing Data [45]

Race/Ethnicity	JUVENILE ABUSE	JUVENILE CUSTODY	JUVENILE NEGLECT
White	1,910	1,403	9,186
Black	664	514	2,341
Hispanic	62	50	265
Asian / Pacific Islander	11	14	36
Native American	9	1	39

**Figure 5-4 CA/N Referrals by Allegation and Age**

The vast majority of abuse, neglect, and custody referrals were for youth 12 years of age and younger [13,556], with neglect (74%) as the most frequently reported allegation. Missing [17]

Age	JUVENILE ABUSE	JUVENILE CUSTODY	JUVENILE NEGLECT
< 10	1,512	1,344	8,148
10	158	84	661
11	153	82	640
12	138	82	554
13	164	79	468
14	170	95	451
15	180	96	457
16	149	97	467
>= 17	62	33	163

**Action Taken for Child Abuse & Neglect Referrals**

**Figure 5-5 CA/N Referrals by Action Taken**

Fifty-one percent of CA/N referrals were disposed through the informal court process [8,452]. The remaining 46% [7,717] of referrals were handled through formal court process. Missing Data [535]

**Child Abuse & Neglect Referrals by Disposition**

**Figure 5-6 CA/N Referrals by Disposition**

Allegation True, Out-of-home Placement was the most frequently applied disposition [40%, 6,476] to CA/N referrals, followed by Transfer to Other Agency (CD) [13%, 2,110] and Referral Rejected [13%, 2,034]. Missing Data [535]

## Section 6: Assessment & Classification

---

In 1995, the Missouri General Assembly passed the Juvenile Crime and Crime Prevention Bill [HB 174]. The bill was aimed at reshaping Missouri's juvenile justice system through the development of a comprehensive juvenile justice strategy. As part of the strategy, the Office of State Courts Administrator was charged with coordinating an effort to design and implement a standardized assessment process for classifying juvenile offenders. The result of this effort was the Missouri Juvenile Offender Classification System.

The Missouri Juvenile Offender Classification System includes an empirically validated risk assessment for estimating a youthful offender's relative likelihood of future delinquency and a classification matrix that links the level of risk and offense severity to a recommended set of graduated sanctions. The system also includes a needs assessment for identifying the underlying psychosocial needs of youth.

Since its inception, the Missouri Juvenile Offender Classification system has helped Missouri's juvenile justice professionals to ensure public safety, promote statewide consistency in the services and supervision of youthful offenders, and estimate juvenile officer workload.

Section 6 presents information on juveniles with referrals, disposed during calendar year 2016, who had risk and needs assessments entered on the **Custom Assessment Maintenance (CZAASMT)** form of JIS. When a referral has more than one associated risk/needs assessment(s), the highest score is reported. When a referral is not associated with any risk/needs assessment(s) in the reporting year, the score associated with the risk/needs assessment that was completed on the nearest date before or after the initial filing date of the referral is the one that is reported, regardless of the year the assessment was completed. Figures 6-1 to 6-3 provide risk level information with Tables 6-1 and 6-2 providing information about the prevalence of individual risk factors. \*\*

*\*\*Readers should refer to Missouri's Juvenile Offender Risk & Needs Assessment and Classification System Manual (2005) for the operational definitions of risk and needs factors.*

Strong social support system	6,885	46.5 %
Limited support system, with one positive role model	6,202	41.9 %
Weak support system; no positive role models	1,442	9.7 %
Strong negative or criminal influence	283	1.9 %

## Section 7: Detention Services

---

Missouri's juvenile and family division of the circuit court includes 17 detention facilities to house youth in need of secure detention. Juvenile justice personnel identify offenders most in need of secure detention using the objective criteria contained in Missouri's Juvenile Detention Assessment (JDTA). In addition, 16 detention centers participate in the Annie Casey Foundation Juvenile Detention Alternatives Initiative (JDAI) [highlighted in table 7-1] for CY16. [The 29<sup>th</sup> and 32<sup>nd</sup> circuits also participate in JDAI but do not have detention centers.] JDAI is an effort to assist the juvenile and family division with development and use of community-based alternatives to secure detention when detention is determined to be unnecessary or inappropriate. The initiative emphasizes the collection and application of objective data to identify practices that may contribute to over-utilization of secure detention, detention overcrowding, and disproportionate minority confinement.

Section 7 presents admission, discharge, population, and length of stay information entered on the ***Custom Room Facility Assignment (CZAROOM)*** form of JIS for Missouri's secure detention facilities. Depending on the reporting objective, counts are based on admissions or discharges; a single youth may be counted multiple times if they were detained on more than one occasion.

## Section 7: Detention Services

<p><b>Table 7-1 Youth Population August 31 of CY16</b></p> <p>Metropolitan circuits [16, 21, &amp; 22] account for 57% of all youth detained in Missouri as of the last day of August 2016.</p> <p><b>Note:</b> Non-JDAI sites with detention facilities are shaded.</p>	Circuit	Population	Percent MO Youth Detained

The average daily population was least for ages 12 and younger [6] and 17 and older [6]. Missing Data [1].</p>														
<=12	6.2																						
13-14	40.1																						
15-16	110.5																						
>=17	5.6																						

**Figure 7-11 Median and Average Length of Stay by Sex**

The statewide average length of stay in detention facilities was 20 days for males and 13 days for females. The median length of stay for males was 8 days, while the median length of stay for females was 6. Missing Data [4].

**Figure 7-12 Median and Average Length of Stay by Race**

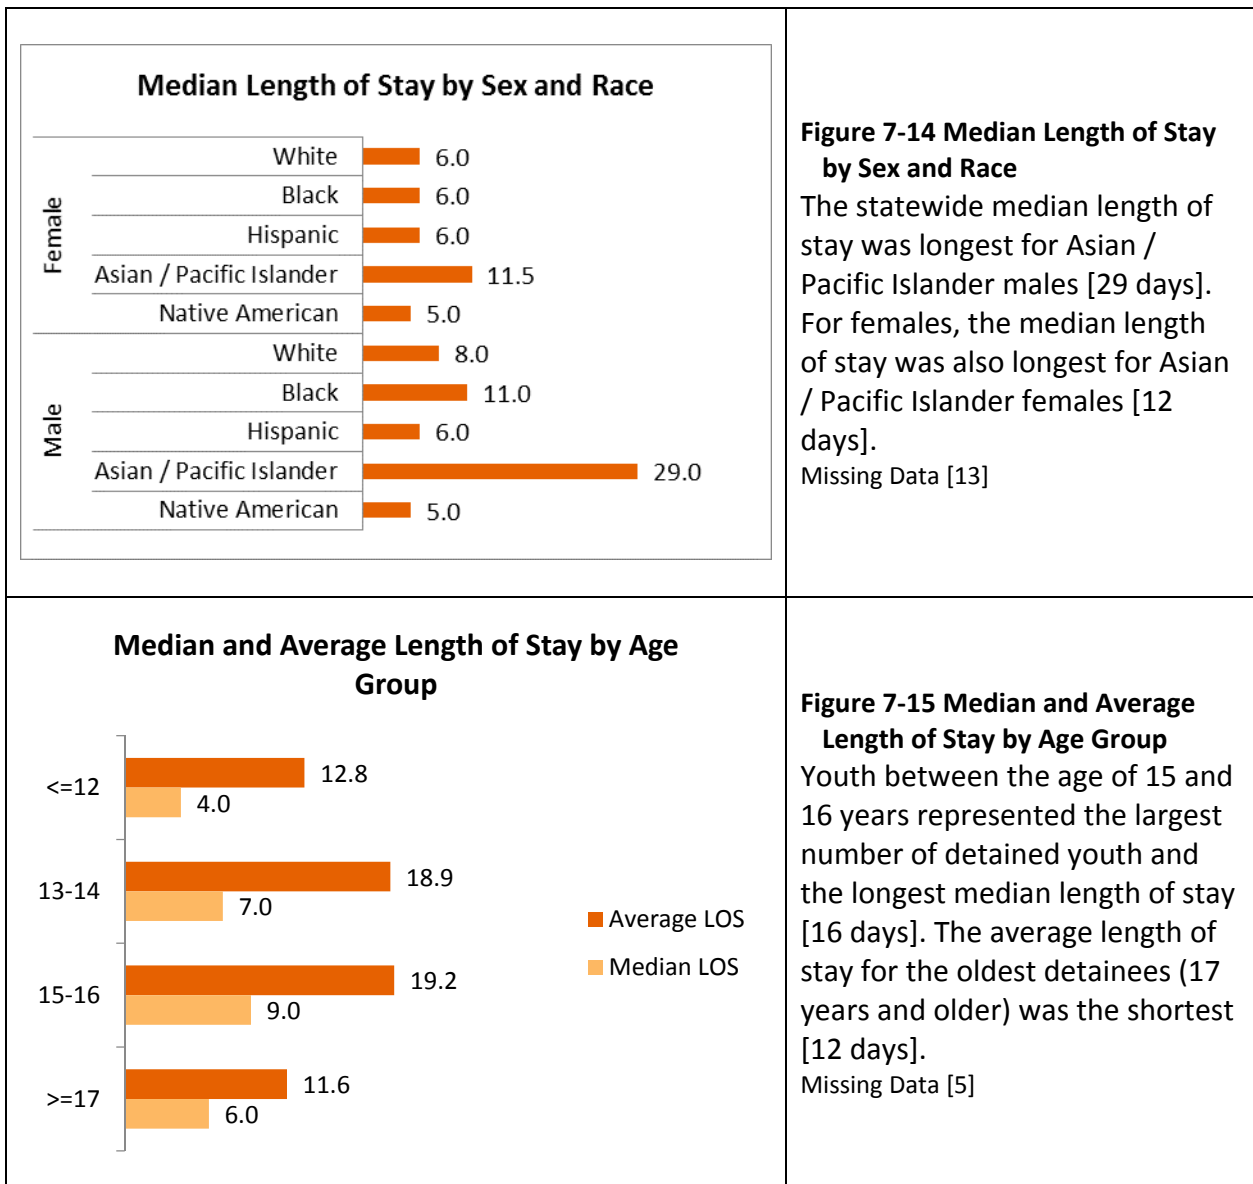

Black youth had a longer statewide average length of stay in detention facilities [23 days] than white and other minority youth besides Asian / Pacific Islander youth. Asian / Pacific Islander youth had the longest median length of stay [18 days]. Missing Data [5]

**Figure 7-13 Average Length of Stay by Sex and Race**

The statewide average length of stay was longest for Asian / Pacific Islander males [29 days] and black males [25], while Hispanic males [13], white males [15], and Native American males [7] had shorter stays on average. The average length of stay was longer for Asian / Pacific Islander females [16 days] and black females [15] than for white females [11], Hispanic females [10] or Native American females [8]. Missing Data [13]

## Section 8: Division of Youth Services Commitments

Section 8 presents demographic information on youth committed to the Division of Youth Services (DYS) identified by a docket entry of DDYS – Committed to DYS on the ***Custom Docket Entry and Maintenance (CDADOCT)*** form of JIS in CY16. For circuit level information on these commitments, refer to Appendix M. Assuming commitments to DYS are entered into JIS only once for a youth, the count is unduplicated. (**Note:** Docket entries in JIS produce data different from that historically reported by DYS.)

**Figure 8-1 Statewide DYS Commitments by Sex and Race**

There were 606 youths committed to the custody of DYS in CY16. A majority [83%, 502] were male. White youth accounted for 57% [347] of juveniles committed to DYS, while black youth accounted for 37% [221]. The remaining 6% percent [37] were from other race groups.

Missing Data [1]

**Statewide DYS Commitments by Sex and Race**

**Figure 8-2 Statewide DYS Commitments by Age Group**

Sixty-nine percent [420] of youth committed to DYS were between the ages of 15 and 16. An additional 20% [121] were between 13-14 years of age. Youth younger than 13 years accounted for 2% [11], while 9% [54] of youth were aged 17 or older.

Missing Data [0]

**Statewide DYS Commitments by Age Group**

## Section 9: Certification to Adult Court

Section 9 presents demographic information about youth certified to adult court, identified by the docket entry of DJVCA - JUV Certified to Adult Court on the ***Custom Docket Entry and Maintenance (CDADOCT)*** form of JIS in CY16. For additional circuit level information about these certifications, refer to Appendix N. Assuming certifications are entered into JIS only once for a youth, the count presented is unduplicated.

<p><b>Figure 9-1 Certifications by Sex</b></p> <p>The statewide total for offenders certified to adult courts was 53. Males represented 98% [52] while females only represented 2% [1].</p>	<p><b>Statewide Certified Youth by Sex</b></p>  <table border="1"> <thead> <tr> <th>Sex</th> <th>Count</th> </tr> </thead> <tbody> <tr> <td>Female</td> <td>1</td> </tr> <tr> <td>Male</td> <td>52</td> </tr> </tbody> </table>	Sex	Count	Female	1	Male	52

## Section 10: Juvenile Offender Recidivism

---

Juvenile divisions across the country are being asked to provide evidence that public funds are used in cost-effective ways to reduce and prevent juvenile crime. For Missouri juvenile divisions to measure progress in this area, the following statewide definition of juvenile offender recidivism was developed through consensus:

*“A juvenile offender recidivist is any youth, referred to the juvenile office for a legally sufficient law violation during a calendar year, who receives one or more legally sufficient law violation(s) to the juvenile or adult court within one year of the initial referral’s disposition date.”*

Section 10 presents the demographic and offense characteristics that influenced recidivism rates for the CY15 cohort of Missouri juvenile law offenders who were tracked through CY16 for recidivism.

<p><b>Offender Population as a Proportion of Missouri Youth</b></p>  <p>This bar chart compares the proportion of non-offenders and offenders within the Missouri youth population. The y-axis represents the percentage, ranging from 0% to 100%. The x-axis lists two categories: Non-Offenders and Offenders. The Non-Offenders bar is dark orange and reaches 98.3%. The Offenders bar is light orange and reaches 1.7%.</p> <table border="1"> <thead> <tr> <th>Category</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Non-Offenders</td> <td>98.3%</td> </tr> <tr> <td>Offenders</td> <td>1.7%</td> </tr> </tbody> </table>	Category	Percentage	Non-Offenders	98.3%	Offenders	1.7%	<p><b>Figure 10-1 Missouri Youth Offender Population</b> Approximately 2% [10,662] of the 629,138 juveniles aged 10-17 were referred to Missouri's juvenile and family division for legally sufficient law violation referrals in CY15.</p>
Category	Percentage						
Non-Offenders	98.3%						
Offenders	1.7%						
<p><b>Percentage of Youth Recidivating (All Law)</b></p>  <p>This bar chart shows the percentage of youth recidivating across all law violations. The y-axis represents the percentage, ranging from 0% to 100%. The x-axis lists two categories: Non-Offenders and Offenders. The Non-Offenders bar is dark orange and reaches 79.1%. The Offenders bar is light orange and reaches 20.9%.</p> <table border="1"> <thead> <tr> <th>Category</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Non-Offenders</td> <td>79.1%</td> </tr> <tr> <td>Offenders</td> <td>20.9%</td> </tr> </tbody> </table>	Category	Percentage	Non-Offenders	79.1%	Offenders	20.9%	<p><b>Figure 10-2 Percentage of Youth Recidivating (All Law)</b> Twenty-one percent [2,233] of the 10,662 juvenile law offenders in CY15 recidivated through a new law violation within one year of the disposition date of their initial referral.</p>
Category	Percentage						
Non-Offenders	79.1%						
Offenders	20.9%						
<p><b>Percentage of Youth Recidivating (Misd A or Felony Charge)</b></p>  <p>This bar chart shows the percentage of youth recidivating specifically for Class A misdemeanors or felony charges. The y-axis represents the percentage, ranging from 0% to 100%. The x-axis lists two categories: Non-Offenders and Offenders. The Non-Offenders bar is dark orange and reaches 85.1%. The Offenders bar is light orange and reaches 14.9%.</p> <table border="1"> <thead> <tr> <th>Category</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Non-Offenders</td> <td>85.1%</td> </tr> <tr> <td>Offenders</td> <td>14.9%</td> </tr> </tbody> </table>	Category	Percentage	Non-Offenders	85.1%	Offenders	14.9%	<p><b>Figure 10-3 Percentage of Youth Recidivating (Misd A or Felony)</b> Fifteen percent [1,587] of the 10,662 juvenile law offenders in CY15 recidivated either with a new Class A misdemeanor or felony offense within one year of the disposition date of their initial referral.</p>
Category	Percentage						
Non-Offenders	85.1%						
Offenders	14.9%						

**Figure 10-4 Percentage of Youth Recidivating (Felony Charge)**

Five percent [497] of the 10,662 juvenile law offenders in CY15 recidivated with a felony offense within one year of the disposition date of their initial referral.

**Percentage of Youth Recidivating (Felony Charge)****Figure 10-5 Percentage of Youth Recidivating by Year**

The percentage of the recidivists with any law violation declined by 1.2% between 2014 and 2015. Additionally, the percent of youth who recidivated with either a Class A misdemeanor or felony decreased from 15.4% to 14.9%, while the percentage of youth recidivating with a felony remained practically the same [0.1% increase].

**Percentage of Youth Recidivating by Year****Figure 10-6 Percentage of Youth Recidivating by Sex**

Males [24%] from the CY15 cohort recidivated at a higher rate than their female [14%] counterparts. This holds true for those who recidivated with either Class A misdemeanor or felony offense, as well as for those who recidivated with only a felony offense.

**Percentage of Youth Recidivating by Sex**

**Percentage of Youth Recidivating by Race****Figure 10-7 Percentage of Youth Recidivating by Race**

Proportionately, black youth [25%, 783], Hispanic youth [20.2%, 54], and Native American youth [21.4%, 6] from the CY15 cohort had a higher rate of recidivism than their white counterparts (19%, 1,379) for all law referrals.

**Percentage of Youth Recidivating by Circuit Type****Figure 10-8 Percentage of Youth Recidivating by Circuit Type**

Recidivism from CY15 for all law violations was slightly higher for youth in single-county [22%, 1,272] than for youth in multi-county circuits, [20%, 961]. The percentages were higher by 3% for Class A misdemeanors and felonies [17%, 1,003] in single county circuits than in multi-county circuits [12%, 584], and also higher for just felony referrals in single county circuits [5%, 310] than in multi-county circuits [4%, 187].

**Percentage of Youth Recidivating by Age Group****Figure 10-9 Percentage of Youth Recidivating by Age**

The percentage of recidivism is highest for youth between the ages of 14 and 15 years for all types of offenses.

## Section 11: Disproportionate Minority Contact (DMC)

---

### Disproportionate Minority Contact (DMC) Initiative

DMC is one of four core requirements of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended in 2002. All states are required by the Office of Juvenile Justice and Delinquency Prevention (OJJDP) to make efforts to document and reduce DMC.

DMC occurs whenever the overall volume of activity for minority youth at various juvenile justice contact points is disproportionately larger than the volume of activity for white youth at those points. It is important to examine *all* juvenile justice contact points due to the likelihood that minority youth will penetrate deeper into the juvenile justice system as a result of disproportionate minority contact with the system.

The existence of disproportionality does not necessarily mean that minority youth are experiencing disparity (or unequal treatment), because further analysis is needed to determine whether or not disproportionality is a consequence of disparities and/or other contributing mechanisms.

For additional county level information about DMC, refer to Appendix O.

### What is a Relative Rate Index (RRI)?

The data analysis of the OJJDP Relative Rate Index (RRI) compares the relative volume of activity (rate) for eight court contact points for each minority youth group with the volume of activity (rate) for the majority group (white youth). It provides a single index number that indicates the extent to which the volume of contact differs.

Because the Relative Rate Index is intended to capture the overall extent of youth involvement with the juvenile justice system, the RRI calculation is based on *cases*, not individual *youth*. If a youth is referred to the juvenile court multiple times during the course of a single year, all of those referrals are included. Therefore, the data provided include ***duplicated*** counts for all court contact points.

**Example:** The RRI comparing rates of referral to juvenile court:

Rate of Referral for black youth:

$$\frac{\text{\# of black youth referred}}{\text{\# of black youth in population}} = \frac{150}{500} = 0.30 \times 1000 = 300$$

Rate of Referral for white youth:

$$\frac{\text{\# of white youth referred}}{\text{\# of white youth in population}} = \frac{200}{5000} = 0.04 \times 1000 = 40$$

Relative Rate Calculation for Referrals:

$$\frac{\text{Rate of Referral for black youth}}{\text{Rate of Referral for white youth}} = \frac{300}{40} = \mathbf{7.5 \text{ RRI}}$$

If the RRI is larger than 1.0, that means that the minority group experiences contact more often than white youth. If it is less than 1.0, that means that contact is less frequent. In this example, the RRI for black referrals is 7.5. This means that black youth are seven and a half times more likely to be referred to the juvenile office than white youth.

With the exception of the first rate (referral), which is calculated using the base of the number of youth in each major racial/ethnic grouping in the general population, each of the subsequent RRIs is calculated based on the volume of activity for that racial/ethnic group in a proceeding stage in the case process. See Table 11-1.

**Table 11-1: Identifying the Numerical Bases for Rate Calculations**

Decision Stage / Contact Point	Base for Rates
Referrals to Juvenile Court	Rate per 1,000 Population
Referrals Diverted	Rate per 100 Referrals
Referrals Involving Secure Detention	Rate per 100 Referrals
Referrals Petitioned	Rate per 100 Referrals
Referrals Resulting in Delinquency Findings	Rate per 100 Petitions
Referrals Resulting in Supervision / Probation Placement	Rate per 100 Delinquency Findings
Referrals Resulting in Confinement in Secure Juvenile Correctional Facilities	Rate per 100 Delinquency Findings
Referrals Transferred to Adult Court	Rate per 100 Petitions Filed

**Table 11-2: Relative Rate Index (RRI) Values**

Area of Concern	Decision States or Contact Points
More than 1.00	Referrals to Juvenile Court Referrals Involving Secure Detention Referrals Petitioned Referrals Resulting in Delinquency Findings Referrals Resulting in Confinement in Secure Juvenile Correctional Facilities Referrals Transferred to Adult Court
Less Than 1.00	Referrals Diverted Referrals Resulting in Supervision / Probation Placement

**Note:** RRI values that cause DMC concern can be greater than 1.00 or less than 1.00.

#### What Data are Used?

- U.S. Census data for youth ages 10-16 in all counties in Missouri. Seventeen year olds were not included, because they are under the jurisdiction of the adult court.
- Census data from the previous Calendar Year was used, because the Census population updates for the current year are not available at the time of publication.
- Office of State Courts Administrator delinquency data in the Judicial Information System (JIS). Law violation referrals and status referrals (but not child abuse and neglect referrals) were included.
- Transfers to other juvenile court referrals were not included.

#### What is a Parity Number?

- This is the number of minority referrals that would need to be reduced for the rate of juvenile justice involvement to be statistically equal for white and minority youth.

## Section 11: Disproportionate Minority Contact

**Table 11-3: 2016 Statewide Relative Rate Indices**

Black youth experienced the largest disproportionality overall. Black youth were over-represented at referral, while Hispanic, Asian /Pacific Islander, and Native American youth were under-represented at that point. Black youth and Hispanic youth were over-represented at secure detention. Black, Hispanic, and Asian / Pacific Islander youth were over-represented at petition. Black youth also experienced disproportionality at: diversion, supervision, secure confinement, and certification. Statewide, black youth were under-represented at adjudication.

Contact Point	Black	Hispanic	Asian / Pacific Islander	Native American
Referral	2.1	0.5	0.2	0.4
Diversion	0.9			
Secure Detention	2.6	1.4		
Petition	1.5	1.4	1.5	
Adjudication	0.8			
Supervision	0.9			
Secure Confinement	1.2			
Certification	10.1			

**Note:** Caution should be used when interpreting the Hispanic data, because race and ethnicity are not separated in JIS. Thus, Hispanic youth are under-counted.

**Figure 11-1 Six-Year Trend of Statewide RRI for Referrals of Black Youth**

The RRI for referrals of black youth decreased from 2008 to 2011, but it subsequently increased from 2011 to 2013 before declining in 2014 and 2015 and then increasing in 2016. The reason for this is that, although referrals declined for all youth from 2010 to 2016, they did not do so evenly across groups in each year.

## Section 12: Juvenile Officer Workload

---

The Juvenile Officer Weighted Workload (JOWWL) system is an automated means of estimating the direct service need for additional deputy juvenile officers in Missouri's 35 multi-county circuits. The JOWWL compares the number of staff hours required to screen and process the status, law, and CA/N referrals received by juvenile divisions and to supervise youth in accordance with the ***Standards for the Administration of Juvenile Justice***, against the actual number of staff hours available to complete these direct service activities. When workload demand exceeds the number of staff hours available to meet it, a need for additional direct service personnel is projected. The Circuit Court Budget Committee (CCBC) adopted and first used the results of the JOWWL for estimating FTE needs for juvenile officers in fiscal 2004. The CCBC has since used the JOWWL annually for this budgetary purpose. In the Spring of 2013 a new workload study was conducted by the National Center for State Courts, and a new model was delivered January 2014. The new model required new methods of retrieving data from JIS pertaining to different activities conducted in Juvenile Courts, including diversion programs. The old model was used until January 2015 until sufficient data had been collected to calculate an annual workload using the new model.

### **Example of Workload Estimate for Mock Multi-County Circuit**

**Annual Case-Specific Workload:** Annual total work hours required to service juvenile cases at established standards includes screening, processing and supervising delinquency and CA/N cases, based on workload values identified by the 2013 juvenile officer workload study [Table 12-1].

*Example: Mock Circuit, 5,264 hours of direct service work are required to accommodate case management demand.*

**Staffing Demand:** Total number of direct service staff needed to meet Annual Case-Specific Workload. (Annual available work hours per Juvenile Office is 1,316)

*Example: Mock Circuit, Total Annual Case-Specific Workload / 1,316 hrs. = Staffing Demand (5,264 / 1,316 hrs. = 4.0 direct service staff needed).*

**Circuit FTE:** Total number of direct service staff currently employed by circuit.

*Example: Mock Circuit employs 3 direct service staff. Currently this includes all state-paid DJO I & II positions and all full-time staff paid through DYS diversion grant funds.*

**FTE Need:** Additional direct service staff needed to service Total Workload Hours per standards.

*Example: Mock Circuit, Staffing Demand – Circuit FTE = FTE Need (4.0 - 3.0 = 1.0 additional direct service staff).*

## Section 12: Juvenile Officer Workload

<b>Table 12-1 Workload Values per Year from Juvenile Officer Workload Study (2013)</b>		
<b>Section Name</b>	<b>Column Description</b>	<b>Workload Value (hrs.)</b>
Diversion	Diversion	61.20

## Section 13: CA/N Time Standards

---

In March 2005, the Supreme Court of Missouri issued an order adopting Court Operating Rule (COR) 23.01, Reporting Requirements for Child Abuse and Neglect Cases, effective July 1, 2005. This COR requires the presiding judge in each circuit to submit a quarterly report (CA/N Quarterly) to OSCA. The CA/N Quarterly Report lists all child abuse and neglect hearings where standards were not met during the quarter. These standards are based on the requirements of Supreme Court Rule 124.01, Rules of Practice and Procedure in Juvenile Divisions and Family Court Divisions of the Circuit, which states that the following hearings shall be held:

- 1) Within three days, excluding Saturday, Sunday and legal holidays, a protective custody hearing
- 2) Within 60 days, an adjudication hearing
- 3) Within 90 days, a dispositional hearing
- 4) Every 90 to 120 days after the dispositional hearing during the first 12 months in which the juvenile is in the custody of the children's division, a case review hearing
- 5) Within 12 months and at least annually thereafter, a permanency hearing
- 6) As often as necessary after each permanency hearing, but at least every six months, during the period in which the juvenile remains in the custody of the children's division, a permanency review hearing.

The data from each circuit are compiled into a final report and submitted to the Supreme Court Chief Justice and the Commission on Retirement, Removal and Discipline.

**Table 13-1 CA/N Hearings Held Timely**

In FY16, the juvenile and family divisions conducted the required CA/N hearings in a timely fashion. Forty divisions held 95% or more of their hearings on time; while at the statewide level, 97% of hearings were held timely.

Circuit	Hearings Held	Hearings Held Timely	Percent Held Timely
